

BUILDING THE J & E JUNIOR: INTRODUCTION

Check with your local bearing dealer -- they can order the 2½" dia. x 12" castiron bar stock, gears, and bushings. You will probably find most of the small pieces of flat and round stock in your own scrap pile.

I sincerely hope you will have as much fun building and showing this engine as I have.

As I have no control over materials or workmanship used in construction of the J & E Junior, I can not be held responsible for any damages or injuries incurred.
